V.

1. The present application does not meet the requirements of Article 33(2) PCT, because the subject-matter of claim 27 is not new.

Document D2, which is considered to represent the most relevant state of the art, discloses (cf. appended abstract; Fig 1, bottom drawing) a confectionery packaging having all the features of claim 1 (see in particular the fact that the edges of the package are adhered such as to easily be peeled off; a first pocket is formed at the bottom part of the open package - see Fig. 1, bottom drawing; the two sections forming a further releasable sealing are sections 6).

The features of claim 27 are also disclosed by documents US-A-4 402 403 (see in particular col. 2, lines 33-52; Fig. 1), US-A-3 380 576 (D5) (see in particular col. 2, lines 1-47; adhesive tab 29), US-A-4 505 385 (D6) (flap 43 in Fig. 2) and GB-A-921 980 (D7) (see breakable sealings 9 and further releasable sealing 7, 8 in Figs. 3, 6) which were not cited in the international search report. Copies of the documents are appended hereto.

2. The subject-matter of claims 28-32 is either not new or not inventive, appearing to relate to minor contructional features which, insofar as not directly disclosed in the prior art (such as the peel-off feature of D2 relevant for claim 28), are considered to relate to obvious modifications thereof. Such features will be selected and used by the man skilled in the art as and when he needs them, without any inventive thought being required.

Amended claims

27. Confectionery packaging (40) comprising at least one pocket (403; 9) for receipt of confectionery,

5

said at least one pocket comprising at least one breakable sealing (405)

said packaging (40) comprising at least two sections (401, 402)

said at least two sections (401, 402) forming a part of a further releasable sealing of

10

said at least one pocket.

28. Confectionery packaging (40) according to claim 27, wherein

said further releasable sealing (41, 42) comprising at least one releasable adhesive (404).

15

adapted for fastening the at least two sections (41, 42) in a folded position around said at least one pocket (403) in at least one closed position.

29. Confectionery packaging (40) according to claims 27 or 28, wherein

20

said at least one pocket (403) being formed, preferably folded, by at least one first pocket section (4030) and at least one second pocket section (4031).

30. Confectionery packaging (40) according to any of the claims 27 or 29, wherein

25

the at least one pocket (403) extending from an end of the packaging in its unfolded position towards the other end, and where said pocket comprising at least one opening (4032) is formed by the said by at least one first pocket section 4030, and where said at least one opening (4032) is mechanically stiffened by extending said at least one first pocket section (4030) beyond at least one folding line (4040) formed

30

by said at least one first pocket section 4030, said at least one second pocket section (4031) and one of said at least two sections (41, 42).
